**HOVENSA, St. Croix:** Hazardous Waste Programs Branch met with staff of the Clean Water Division's NPDES program to discuss the results of the recent outfall sampling from the Limetree Bay Terminals wastewater treatment plant, which handles the wastewater from the HOVENSA ERT's groundwater remediation project. Although there were no exceedances of the current USVI Water Quality Standards in the outfall discharge to Limetree Bay, it was concluded that the presence of metals in some of the samples should be brought to the attention of the VIDPNR. The NPDES program agreed to follow up with DPNR on this matter.
